

Brand change:

# Sumatriptan injection (Say 'soo-ma-trip-tan')

Sumatriptan is used to relieve a migraine or cluster headache.

The brand of sumatriptan injection is changing from Imigran to **Clustran**.

## How is Clustran different?

Clustran and Imigran have the same active ingredient (sumatriptan), but they come as different devices.

- Imigran has a cartridge pack and auto-injector device, which you assemble before you use.
- Clustran comes as a ready-to-use pre-filled pen. This means the pen is already filled with the right dose of sumatriptan medicine.

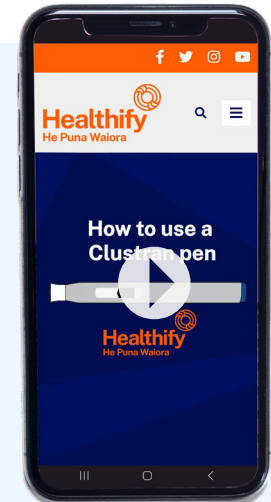

Each Clustran pen can be used once, for a single injection. Talk to your pharmacist about how to get rid of your used injection pen safely.

**It's important to know how to use your Clustran pen before you get a migraine or headache.**

**Note:** Talk with your doctor, nurse or pharmacist if you have any questions about Clustran.

## Learn how to use your Clustran pen

Clustran is most effective if used when your pain starts.
