

# Health Consumer ADVISORY SERVICE NZ

## Start right and co-design services with those who use them – consumers!

The Health Consumer Advisory Service has been established by the Ministry of Health and Health Navigator Charitable Trust to enable health service planners and providers to engage directly with experienced consumer representatives.

Such input can lead to more effective, efficient, whānau-centred, timely, safe and equitable services and positive health outcomes. Create services that are more fit for purpose. You'll be amazed by the difference consumer input can make.

**Advocacy**

**Patient perspective**

**Lived experience**
